

24" RGB LED Wall Washer

EL-24RGBWW

UL-Listed
 Weight: 16 lb. 8 oz.
 Length: 25 in.
 Width: 5.75 in.
 Height (component): 4.25 in.
 Height (unit): 6.5 in.
 Power Cord Length: 45 in.
 DMX Cables (2) Length: 21 in.
 Rotary Angle of Base: 150°
 UV/IR: none

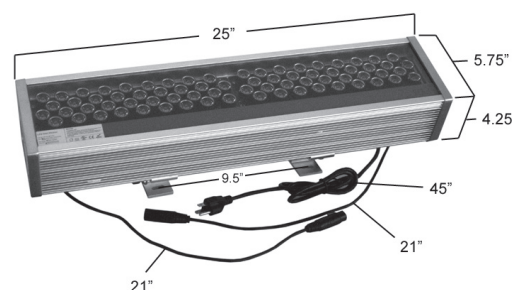

Product Description

The 24" RGB LED Wall Washer is equipped to add color and drama to any event or room. This is simple to operate but serious technicolor lighting. Use it to decorate both indoor and outdoor settings, as it is water resistant to all but submerging. This full color LED fixture is a dynamic and brilliant device for high-lighting buildings, restaurants, gardens, patios, and more. And at home, this wall washer creates loads of atmosphere, whether for a party, or to liven up a special room in the house. With 72 LEDs total, this powerful RGB spotlight is indispensable onstage in a theater or club. And you can operate this adaptable UL-Listed LED wall washer in one of three ways: on an internal setting, in DMX mode and as part of a daisy chain.

Used in internal mode, no other equipment is required to set the wall washer to generate astounding color-changing effects. They include fading, flashing, static colors and seven colors changing in sync. In DMX mode, an external controller is required, but the number of effects possible grows exponentially into the thousands. Finally, to create a daisy chain, link several washers to one another for a series of special effects that can be triggered by just one RGB controller.

The 24" RGB LED Wall Washer comes with a hard-wired power cable, as well as two DMX cables that make it compatible with a DMX controller and additional washers. Each patented washer is made of light but strong aluminum alloy, built for durability and stability. And at Elemental LED, we care about our planet, so all of our products hold the eco-friendly RoHS (Restriction of Hazardous Substances) certification. This ensures that no environmentally harmful components were used in the manufacturing process. This multi-color LED fixture is also energy-efficient and UL-Listed, which means it has the highest safety rating. Aided by the washer's built-in cooling system, these LED bulbs are rated to last over 50,000 hours, five times as long as a CFL. All you have to do is plug in the 24" RGB Wall Washer to let the low-maintenance, high-tech magic begin!
