- Depth: 0.53 in.
- Lead Wire Length: 3 feet
- Fixture Surface Temp.: 68° - 154° F
- UV/IR Radiation: None
- Lifespan: 50,000+ hours

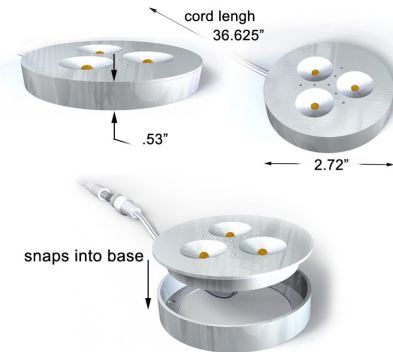

This 3 Piece Cree LED Puck Light Kit emphasizes energy efficiency and quality. LED pucks were designed with the kitchen in mind, but are also great for other difficult-to-light areas in your household – perhaps the corner office nook where you struggle with the printer or the dark garage shelves which cry out for light (can you ever find anything without a flashlight?). Whether you choose the kit in neutral white or warm white, you will benefit from the clarity these puck-shaped lights provide in every instance. Built from brushed aluminum, these stylishly-designed LED kitchen lights fit seamlessly into today's contemporary homes.

This Cree LED Puck Light 3 Pack features superior and brighter bulbs made by Cree, the most cutting-edge manufacturer of LEDs in the world. Every plug-and-play LED light kit comes with:

- * 3 Cree LED Puck Lights
- * a DC 3-Way Splitter
- * a 24 Watt Plug-in DC Adapter

They also offer a long-term lighting solution. Our LED cabinet lights are estimated to last for more than 50,000 hours. Based on average use, that's a lifetime of 7 to 8 years. How many other appliances or products in your house can you count on for that long? Better still, these lights consume very little energy. Each light is less than 3 inches across and contains three tiny LED bulbs. A single kit includes an adapter, splitter and screws. Each kit consumes just 9 watts, well below the amount required of traditional incandescent light bulbs. Your electricity bill will drop if you are replacing traditional incandescent bulbs.

You can trust that our high-quality Elemental products are manufactured according to the strictest standards. The LED kitchen lights, like the others devices in our collection, hold the prestigious RoHS, or Restriction of Hazardous Substances, certification. This ensures that no environmentally harmful components were used in the manufacturing process. Not sure if LED cabinet lights are the right products for your home or business? Contact us for a customized plan that will bring beauty and efficiency to your space, all at a reasonable price.

color	bulb type	color temp.	voltage	lumens	IP rating	beam angle	power consumption / puck	CRI	# of LEDs
warm white	Cree	3000k	12V DC	190	63	90°	4W / 333mA	75	3
neutral white	Cree	6000k	12V DC	205	63	90°	4W / 333mA	80	3
