

Rechargeable Li-Ion Battery Pack

EL-ANLION

Weight: 6 oz.
 Length: 3.7 in.
 Width: 2.4 in.
 Height: 1.1 in.
 Short Circuit Protection: Yes
 Integrated On/Off switch

Lights one 20" Brighter LED Light Bar
 for 15 hours

Our Rechargeable Li-ion Battery Pack is designed specifically to integrate with our Light bars, Flexible LED Lights, or any 12V DC electronic device. The Lithium Ion Battery Pack can be recharged without limitations, as the battery charging process is designed for a slow charge process (10 hours for full charge), which helps the battery pack last longer. Li-ion batteries are commonly found in a laptop or cell phone, due to their compact yet strong nature.

When you purchase our Lithium Ion Battery Pack you will receive:

- * One 3.7" x 2.4" x 1.1" battery box with an integrated On/Off switch
- * An Adapter: 110 to 240V AC, 50/60Hz to 12V, 350mA output
- * An extension cable: with 2 male DC plugs, 26" long

Battery Charging Instructions: Plug the charger to the wall outlet, a red LED on the adapter will light up. Connect the charger cable to the "DC IN/OUT" jack on the battery pack and switch the ON/OFF switch on the battery pack to "ON" position. The green LED will light up during charging. When the green LED is off, the charging has completed.

Battery Overload / Short Circuit protection: This battery pack employs a safety feature that, should any overload / over voltage / short circuit be detected, the battery will automatically cut off the output voltage. In the event that this happens, you will need to recharge the battery again.

| input voltage | output voltage | capacity | charge time |
|----------------|----------------|--------------------|-------------|
| 100V - 240V AC | 12V DC | 3.8 Ah (amp hours) | 10 hours |
