

High Power LED Under Cabinet Inter-Connector

EL-AOPTKINCON

Weight: 0.2 oz.
Length: 1.7 in.
Width: 0.7 in.
Voltage: 24V DC

Product Description

The High Power LED Under Cabinet Inter-Connector is an essential accessory if you need to link two of our High Power LED Under Cabinet Lights directly together. This connector allows two LED Under Cabinet fixtures to join virtually flush end to end, and to be powered by the same source. The connector couldn't be easier to use: just plug in to each end of the two fixtures as you would plug an adapter into any LED fixture.

If you want to have two under cabinet fixtures on the same power source, but need a bit of space between them, try our High Power LED Under Cabinet 8 inch extension cable.
