LED Spacing: 1.9 in.

Max. Daisy-chain: 8 bars

Fixture Surface Temp.: 68° - 104° F

Lifespan: 50,000+ hours

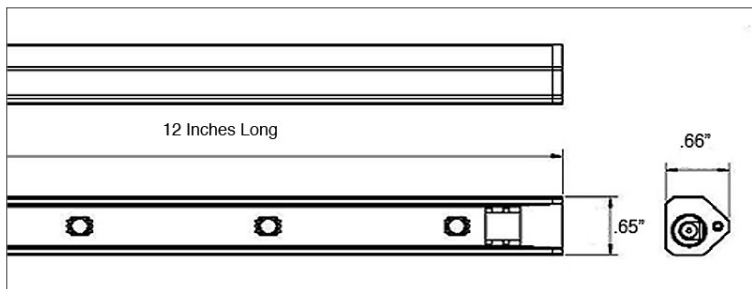

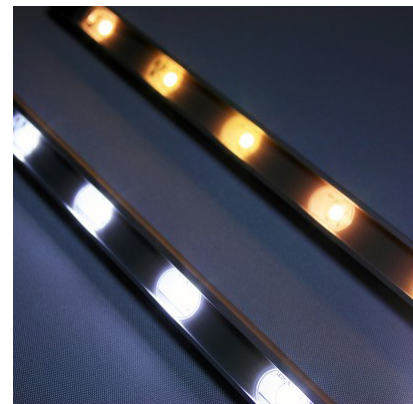

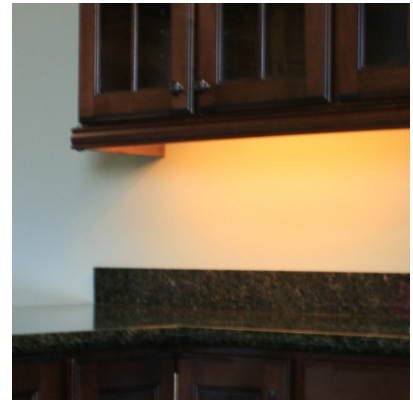

UV/IR Radiation: none

Our 12" High Power LED Under Cabinet Light is the perfect solution to greening your under cabinet illumination. This light bar can be used for any of your task lighting between 1-5 feet, and works especially well in shelving, above counters and inside cabinets. Whether inside your home, in the kitchen or living room, or lighting products in your business, you'll find that these sleek and attractive fixtures supply a pleasing but adequate amount of light, all while using even less energy than a fluorescent tube.

This 12" High Power LED Light Bar contains 6 high-power Nichia LED chips that consume only 7 Watts of electricity, and it comes in two colors: warm white, which is the most similar to the warm yellowish light of an incandescent bulb, and neutral white, which is a pure white that is cooler in feel. This under cabinet LED light package includes two mounting clips with screws, and installing the bar couldn't be easier.

This under cabinet light bar has been tested and certified by the NSF. As all Elemental products do, this LED Light fixture holds the prestigious ROHS (Restriction of Hazardous Substances) certificate, which ensures that no environmentally harmful components were used in manufacturing.

color	color temp.	voltage	lumens	IP rating	beam angle	LED type	power consumption	CRI	# of LEDs
warm white	3000k	24V DC	140	42	110°	Nichia SMD	7W max.	70	6
neutral white	5200k	24V DC	180	42	110°	Nichia SMD	7W max.	75	6
