

## Multi-Color RGB LED Strip to Strip Connector

EL-BVSTRPRGBCON

Weight: 0.1 oz.  
 Length: 0.7 in.  
 Width (inside): 0.4 in.  
 Depth: 0.1 in.  
 Working Voltage: 12V DC  
 IP Rating: non-waterproof  
 Connector Type: (2) flexible RGB LED strip light

### Product Description

The Multi-Color RGB LED Strip to Strip Connector is an LED accessory that gives you a quick and easy way to join two sections of our non-waterproof flexible RGB LED strip lighting. There's no need to solder with this small but powerful connector! Elemental offers an easy solution for connecting two of our 0.4 inch wide full color LED Flexible Light Strips together with the RGB Strip to Strip Connector. This Strip to Strip Connector is designed and manufactured exclusively for Elemental. This RGB connector is compatible only with our 0.4 inch RGB non-waterproof strips.

The Multi-Color RGB Strip to Strip Connector has many advantages that make it an essential accessory in setting up your full color LED lighting installation:

- \* Eliminates need to solder!
- \* Provides a secure connection
- \* Saves time Using this connector couldn't be easier.

### Instructions for use:

1. Pull the brown molex clamp away from the strip using the two small brown tabs.
2. Match the +/- polarity of the strip to that of the connector (you may have to try both ends of the strip)
3. Slide Flexible Strip Light into the connector
4. Using care, firmly secure the clamp with the tabs by squeezing them toward the cable.
5. Repeat process for the other section of strip.
