

20" Brighter LED Light Bar

EL-IMG20UCB

Weight: 3 oz.
 Length: 21 in.
 Width: 0.6 in.
 LED Spacing: 1.4 in. between centers
 UV/IR Radiation: None
 Lifespan: 50,000+ hours

Product Description

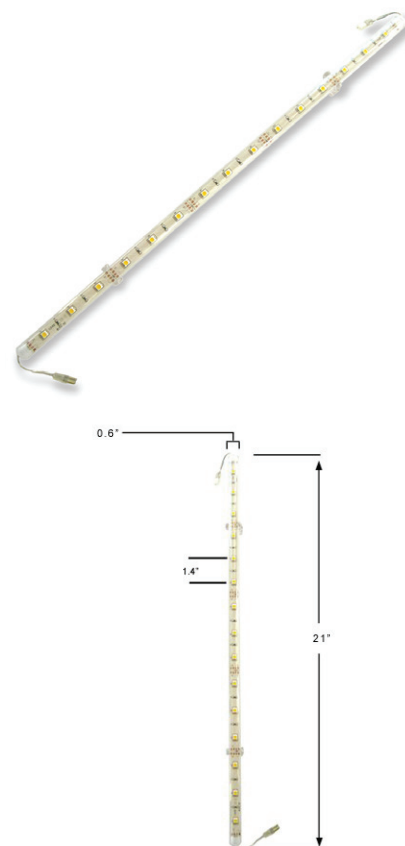

Elemental's 20" Brighter LED Light Bar boasts extremely efficient energy usage at only 3 Watts per bar and, with its compact size, makes an excellent and superior alternative to the fluorescent tube.

The 20 Inch LED Light Bar can be used for a variety of indoor purposes:

- * In businesses such as restaurants, retail stores, bars, lounges, and casinos
- * Home use as under cabinet lighting, bookshelves, cupboards, closets, and drawers
- * Coin-operated machines for vending and amusement
- * Edge lighting and decorative lighting
- * Lighting art, accent pieces, even wine caves (no UV emissions)
- * Architectural models and doll houses
- * Vehicular accent lighting for limousines, RV's and cars
- * Yachts and cruise ships

The 20" Brighter Bar is extremely safe due to the low amounts of electricity required to power it, which means both that it is safe, so there is no danger of shock, and that the bar gives off very little heat, making it perfect to light heat-sensitive items such as food, wine, art, etc. Consider swapping out your standard incandescent or fluorescent kitchen lights for a moment. If you are currently using an incandescent source, you will experience a 90% savings by switching to LEDs. That means that the light bar will pay for itself within one year.

Installation of the 20" Light Bar is extremely simple. Every bar includes two mounting clips, and each clip is attached to the surface with one screw. This bar can be powered with a 12V DC adapter or 12V power driver.

color	kelvin	voltage	lumens	ip	viewing angle	type of led	power consumption	cri	# of leds
warm white	3000k	12V DC	150	44	120°	5050 tri-chip SMD	3W / 250mA	71	15
neutral white	6500k	12V DC	195	44	120°	5050 tri-chip SMD	3W / 250mA	75	15
