EL-IMGWPRIBCLP

Weight: 0.1 oz.  
Length: 1.5 in.  
Width: 0.6 in.  
Screw Holes: 1  
Included: 1 Screw per clip

### Product Description

The Waterproof Flexible LED Strip Light Mounting Clip is custom-made to fit our waterproof flexible LED strip lights and hold them securely in place with the use of just one Philips-head screw. Although one complete spool of Elemental's Waterproof Flexible LED Strip Lighting comes with two mounting clips, if you buy only one or two feet, these mounting clips are an essential accessory for helping the installation of your strip lights go much more smoothly.

Each mounting clip comes with one Philips screw so you don't need to worry about finding the right one. Just attach the clip where you need it on the strip, then screw the clip into a surface. Making your LED lighting installation secure is that simple.
