

4" LED Down Light

EL-LEDWDDL

Weight: 1 lb. 4 oz.
 Diameter: 4.4 in.
 Height: 4.8 in.
 Fixture Surface Temp.: 32° - 95°F
 Housing: Aluminum

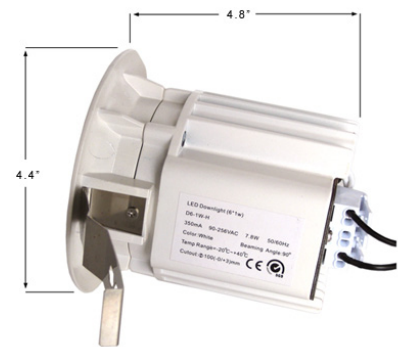

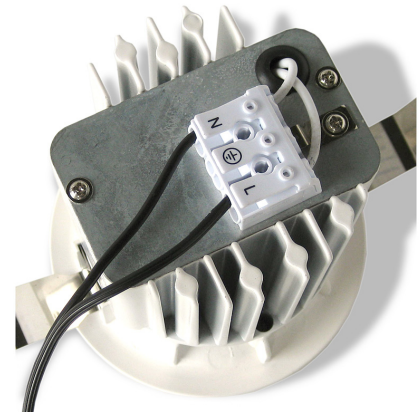

The 4" LED Down Light is an ideal replacement for traditional halogen or fluorescent down lights. This high power LED down light can be used for hotels, restaurants, retail stores, and most other commercial situations, as well as home lighting, whether in a kitchen, dining room or hallway. It will suit any interior situation where a bright light with a wide angle of illumination is required.

The 4" LED Down Light features six 1W high power LED bulbs at 80-90LM per LED. With an output of around 500 lumens while using less than 8 watts of electricity, the 4" LED Down Light is very bright and incredibly efficient.

This down light is housed in sturdy aluminium with a white outer surface and boasts superior heat conduction. The reflector has a white color, with a beam angle of 90°. This light's high-efficiency and wide voltage constant current driver maintains a stable current. This light is available in white and warm white, and is for indoor use only.

Note: Do not put a cover over this downlight. This downlight should not be in direct contact with any materials, such as insulation, except for the ceiling itself. We recommend a distance of at least 2 inches between the top of the light and any surrounding materials and at least 4 inches from the sides to any material. Do not allow the power cord to be in prolonged contact with the heatsink; be sure to lead it up and away from the light when installing.

color	color temp.	voltage	lumens	IP rating	beam angle	LED type	power consumption	CRI	# of LEDs
warm white	2800k	90-256V AC	380	IP20	90°	1W Nichia	7.8W / 650mA	75	6
neutral white	5000k	90-256V AC	480	IP20	90°	1W Nichia	7.8W / 650mA	70	6
