

RGB 4-In-One LED Puck Light Kit

EL-RGB4PKKT

Kit Includes: (4) puck lights, (1) 4-Way Splitter,
 (1) 12V/1.25A adapter, (1) Remote Control
 Puck Dimensions: W=2.3 in., D=0.25 in., Cable=39 in.
 Adapter Dim.: L=2.8 in., W=1.6 in., D=1.1 in., Cable=60 in.
 Remote Control Dim.: L=3.4 in., W=2.1 in., D=0.3 in.
 Splitter Dim.: L=1.8 in., W=1.3 in., D=0.4 in.
 Remote Receiver Dim.: L=2 in., W=1.4 in., D=0.9 in.

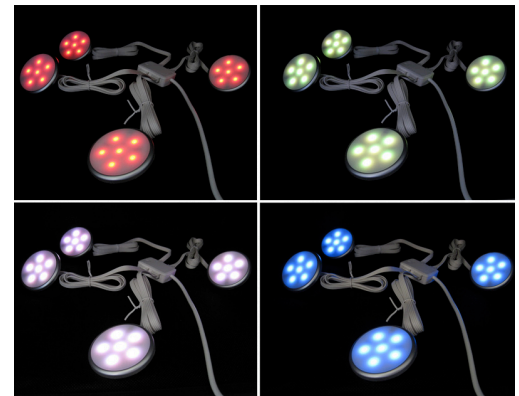

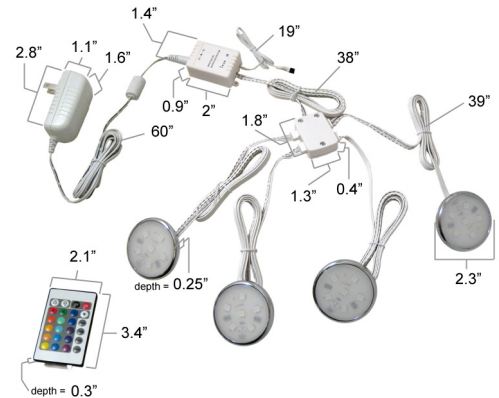

The RGB 4-In-One LED Puck Light Kit is a complete LED under cabinet and shelf lighting package that also adds a splash of color. This 12V color-changing LED kit features a remote control that allows you to change the pucks' colors and mode, and the pucks themselves are ultra-slim, at only ¼ of an inch deep. And, at only 1.44W of energy consumption per puck, this 5.76 Watt kit is very efficient and emits very little heat. With a full 15 shades of color included in this remote-controlled plug-and-play LED puck light package, home LED lighting has never been more flexible or festive.

This kit includes:

- * 4 multi-color LED puck lights, each with a 39 inch cable
- * one 4-way splitter
- * a remote control that you use to change colors and brightness
- * a remote control receiver
- * a 12V DC adapter with a 60 inch / 5 foot cord

The wireless remote control allows you to change the pucks' colors, brightness, and mode. Use the controller to shuffle through the available colors of Neutral White, Red, Green, Blue, Amber, Magenta, and Aqua, to set the pucks to Strobe, which cycles through all 7 colors, or for Fade mode, which gradually cycles through all 7 colors. There are also Smooth and Flash modes, offering many possibilities for color-changing LED light.

Assembly and installation of this color-changing LED light kit is easy: just plug the pucks in to the splitter, mount them, plug the splitter into the remote control receiver, and plug that into the adapter, which plugs into a standard household outlet. Tucking the cords away is also easy: the adapter cable and puck cables are both less than 0.1 inches deep! The RGB 4-In-One LED Puck Light Kit is perfect for use in both home and business: it adds a splash of color to any room in your house—whether in the kitchen, a play room, in shelving, a home bar, or in a family room—or to a display or window in your business. Most importantly, these LED puck lights are flexible and will not only provide light but adapt to any mood.
