

Super Glue Tube

EL-SPRGLUTB1

Weight: 0.5 oz.
Fluid Weight: 0.07 oz.

Product Description

We sell Super Glue by the tube as an alternative to mounting clips and other hardware to help you install your LED fixtures. This Super Glue features a special "extra time" formula that allows more working time as you get the placement of an LED strip light or light bar just right. This glue dries to a super strong final bond.

- * Extra time formula allows more working time
- * Dries to a super strong bond
- * Clog-free cap

Our Super Glue also has a clog-free cap that cleans and seals the nozzle after each use. Starting with a fresh tube of glue is made simple by a twist-on nozzle that pierces the tube, keeping your fingers clear of one incredibly strong adhesive.
