

## 12V Inline On/Off Switch

EL-ZJ12VSW

Weight: 1 oz.  
Length: 9 in. (total), 2.5 in. (switch)  
Width: 0.9 in.  
Colors: black or white  
Input/Output: 12V DC  
Connectors: DC coaxial

This 12V Inline On/Off Switch is for use in switching our LED products on and off between the power source and the fixture. Sleek and discreet, with rounded edges and a subdued black or white color, the 12V Inline Switch is attractive enough to be used in the open and compact enough to be tucked away out of sight.

The connections of this switch are DC coaxial, making it compatible with most of our products, whether directly, in conjunction with the Single Color LED Strip Connector with DC Plug, or by splicing to an alternate connector. The switch, whether modified or not, is perfect for all low-voltage situations. Elemental customers have found this switch an essential accessory for all LED strip lighting and light bars.
