SAFETY & WARNINGS

READ AND FOLLOW ALL SAFETY INSTRUCTIONS

1. Install in accordance with national and local electrical code regulations.
2. This product is intended to be installed and serviced by a qualified, licensed electrician.
3. Do not modify or disassemble this product beyond instructions or the warranty will be void.
4. Do not use if there is any damage to the fixture or wiring. Inspect periodically.
5. Do not install near areas with exposure to salt water or chlorinated water.
6. Do not install in direct sunlight or damage to the LED phosphor will occur.
7. Do not attempt to fix this product in the field.
8. Failure to follow safety warnings, and installation instructions will void the warranty for this product.

HANDLE PRODUCT WITH CARE!

DO NOT BEND LED STRIP LIGHT TO A DIAMETER LESS THAN 4 INCHES.

DO NOT FOLD, CREASE, OR TWIST LED STRIP LIGHT.

DO NOT BEND LED STRIP LIGHT ON A HORIZONTAL PLANE.

DO NOT POWER STRIP LIGHT WHILE ATTACHED TO SPOOL OR TIGHTLY COILED.
**AlphaTECH® LED STRIP LIGHT**

**INSTALLATION**

1. **TURN POWER OFF AT CIRCUIT BREAKER**

   **SHOCK HAZARD!** May result in serious injury or death.
   Turn power OFF at circuit breaker prior to installation.

2. **DETERMINE LOCATION TO INSTALL COMPONENTS**

   Refer to **SYSTEM DIAGRAMS**

   1) Class 2 Driver  2) Control  3) Strip Light

**REQUIRED TOOLS**

1. Phillips-head Screwdriver
2. Ruler (Recommended)
3. Wire Stripper (Recommended)
4. (2) Mounting Clips per 12”.
5. (1) Screw per Mounting Clip

* Do not install product in environment outside listed temperature.

**NOT FOR USE WITHIN POOLS, CHLORINATED WATER, OR SALT WATER ENVIRONMENTS.

**WIRE GAUGE & VOLTAGE DROP**

Ensure applicable wire is installed between driver, fixture, and any controls in between. When choosing wire, factor in voltage drop, amperage rating, and type (in-wall rated, wet location rated, etc.)

Note: AlphaTECH® Strip Light is available with the following connections. Ensure Class 2 power supply is compatible with connector prior to installation.
INSTALLATION (CONT.)

3 TEST CONNECTION

Prior to mounting, attach to Class 2 LED Driver, turn on power and test connection to ensure system is operating properly. Turn off power again before mounting.

4 MOUNT AlphaTECH® LED STRIP LIGHT

*Note: 3M VHB adhesive tape included with AlphaTECH® LED Strip Light is intended for indoor installation only. Refer to INSTALLATION OPTIONS on page 4 for further details.

4.1 Screw mounting clip to surface

4.2 Place AlphaTECH® Strip Light into mounting clip

5 ATTACH DRIVER AND LIGHTING CONTROL.

Verify a compatible driver is installed. Utilize applicable wiring when installing outdoors. (Use of wet location-rated junction box recommended)

6 TURN POWER ON AT CIRCUIT BREAKER

TROUBLESHOOTING

<table>
<thead>
<tr>
<th>Shift in brightness and/or kelvin</th>
<th>• Ensure an appropriate gauge of wire is installed between strip light and LED driver. See VOLTAGE DROP CHARTS.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Some LEDs are not functional</td>
<td>• Ensure strip light has not been bent excessively, which could damage circuitry.</td>
</tr>
<tr>
<td>Lights are flickering</td>
<td>• Ensure a compatible driver and/or dimming control is installed. Check for loose connections.</td>
</tr>
<tr>
<td>Lights are turning on/off repeatedly</td>
<td>• Ensure driver is not overloaded. An overloaded driver will trip the internal auto-reset (of driver) repeatedly, turning the system on/off.</td>
</tr>
</tbody>
</table>

TOOLS & RESOURCES

AlphaTECH® SPECIFICATION SHEET
For full specifications.
INSTALLATION OPTIONS

INSTALLING NEAR WATER OR IN OUTDOOR ENVIRONMENT

Using a wet location rated junction box, connect lead wires from AlphaTECH® Strip Light to wet location rated wires connected to power supply.

INSTALLING WITHIN A CHANNEL (OPTIONAL)

*Note: Placing AlphaTECH® LED Strip Light within another channel may not be necessary nor recommended.

Press AlphaTECH® LED Strip Light firmly into channel. If necessary, include a small amount of silicone adhesive/sealant within the channel to hold it in place.

INDOOR INSTALLATION

Press 3M VHB adhesive tape to back of AlphaTECH® LED Strip Light, then remove protective covering.

Press AlphaTECH® LED Strip Light to clean, dry surface.
SYSTEM DIAGRAMS

The following diagrams are provided as example system designs. For information regarding larger systems or systems not pictured below, please see our web page or contact technical support. Always review each component installation guide for detailed and up-to-date wiring instructions. Install in accordance with national and local electrical codes.

Traditional ON/OFF Switch System

SWITCHEX® Dimmer/Driver System

OMNIDRIVE® Electronic Dimmable Driver System

REIGN® 24V Dimmer System

1. Driver may not require a fault ground connection. Refer to driver specifications for additional information.

2. Install a compatible Class 2 constant voltage driver. Refer to each driver specification sheet for full power ratings & load deratings.

3. Install a Class 2 constant voltage driver compatible with a low voltage PWM controller/dimmer switch. Refer to each driver specification sheet for full power ratings & load deratings.

4. Determine the number of low voltage outputs of the driver when installing multiple PWM controllers/dimmer switches. No more than one PWM controller/dimmer switch can be attached to a single output of the driver.

5. Install a compatible dimming control or switch. See the ‘Electronic Dimmable Driver / Dimmer Compatibility List’ for compatible dimming controls. See the dimming control manufacturer installation guide for complete wiring instructions.

6. Ensure to load the driver at least 60% of the labeled load for proper dimming performance (required for dimmable installations only).

7. Refer to driver or controller specifications for a compatible junction box.

8. See fixture specifications for maximum series run limits.
VOLTAGE DROP CHARTS
For best performance and lumen output, ensure proper wire gauge is installed to compensate for voltage drop of low voltage circuits.

Example: 24V Voltage Drop & Wire Length Distance Chart

1. Determine load size. Let's assume load is 55 W. Round up to nearest load.
2. Determine distance from driver to load. Let's assume the distance is 90 ft.
3. It is recommended to install 12 AWG to eliminate excess voltage drop.
