LIGHT GUIDE PANELS

Display & General Illumination

The best option for even light diffusion across a display or backlit graphic image is now ready to order, with the LED Light Guide Panel by Diode LED. We customize the LED Panel based on your specifications and on the dimensions of the graphic. Using a unique dot pattern on each customized panel, these light guide panels deliver even light distribution previously unavailable on a thin form factor.

FEATURES & BENEFITS

- Low-profile form factor
- Even and consistent light distribution
- Customized dimensions and thickness
